

# *fab audio* presents the “*Brat*”

*detailed, transparent, fast and coherent  
with remarkable imaging and sound staging qualities...*

*fab audio's trademark sound...  
... for the budget conscious audiophile!*

The “Brat” has the essence of our “Model 1” distilled into a compact, inexpensive mini monitor with an 8 ohm, 94 db/w/m rating approaching that of its larger brother. Our trademark ultra light paper cone, high efficiency, very large magnet woofer is combined with an extended range ½” hyperdome tweeter in a unique time aligned system.

The cabinet is of an unusual (for High End Audio) thin wall, non-braced construction with rubber, foam, rubberized bitumen and lead carefully applied throughout the cabinet to achieve optimal fidelity. To obtain the desired bass extension and efficiency from such a small driver we have designed a double tuned reflex enclosure with active ports at both 45 and 90 Hz thereby achieving remarkable bass performance from our customized 6 ½” woofer. An advanced, textured paint is applied to provide an attractive, durable finish.

... bring on the flea powered amps.
